About me

I am a dedicated Computer Engineer and a proficient MERN stack developer with expertise in web development and AWS. I am passionate about expanding my skill set, driven by a commitment to continuous learning and innovation. With an open-minded approach, I thrive on tackling challenges and delivering efficient solutions.

Focus

To grow into a leadership role within 3 years, leveraging my skills to inspire teams, enhance productivity, and deliver impactful solutions.

EXPERIENCE

Web Developer Intern

Ahmedabad

The Special Character

May, 2023 - Aug, 2023

Completed internship in **The Special Character PVT. LTD.** Where I covered front-end development and gained a solid understanding of the Next.js framework and create dynamic and efficient website with seamless user experiences.

Mern Stack Intern

Ahmedabad

Gandhinagar

Vidush Somany Institute of Technology & Research

Oct, 2020 - May, 2024

CPI - 7.34

PROJECTS

Personal Portfolio

(Tech: NextJs, Tailwind CSS)

A 'Personal Portfolio' website is professional website that provides information that what I do, how many programming language I learned, what services I may offer, and how to contact to me. Personal Portfolio website are an easy way to promote myself.

Employee Management Application

(Tech: NextJs, MongoDB, Expressjs, Nodejs, Tailwind CSS)

The Employee Management Application is a web app that helps employees access everything in one place, such as progress reports, task sections, recorded audios & videos. Additionally, all content will be uploaded and managed by the admin.

Real-Time Chat Application

(Tech: NextJs, MongoDB, Expressjs, Nodejs, Tailwind CSS, Socket.io)

The Real-Time Chat Application is designed to reduce the limitations posed by traditional communication platforms, such as centralized control, lack of transparency, and ownership concerns. The Real-Time Chat Application emerges as a transformative solution for seamless, real-time communication.

Language: English, Hindi, Gujarati
